After the review of the self evaluation report based on the standards of Kosovo Accreditation Agency, each of the members of the Working Group provided the comprehensive remarks on various aspects of the study program and their reflections in the Self Evaluation Report of the bachelor study program.

A strong point that is rightly reflected in the self evaluation report is problem-based learning, interdisciplinarity of the curriculum, and modern teaching technologies, including very qualified staff. Therefore, the group rightly addressed these as strong points in the Self-Evaluation Report.

Some of the remarks that were addressed as weak points that should be addressed by the student representative Taulant Blakaj and Ardita Kurteshi are:

- Better recruitment strategy with excellent students;
- Re-introduction of scholarship scheme for excellent students as applicable before 2016;
- More outreach to firms for the practical placement of students;
- More site visits for students especially in infrastructure courses;
- Hire more guest speakers from the industry and real estate developers;
- Increase the number of books in Albanian;
- Organization of study visits to Slovenia;
- Invite more Slovenian professors to teach a module or part of a module;
